Front-end Developer/Programmer

Profile

I am quick learner and I do my all the tasks on time in an organized way. I respect the deadlines. I do my work with full of concentration. I am able to work alone. But, I really enjoy to work in a team, because I can share my ideas and chance to enhance my skills in designing as well as programming by working with team. I have good knowledge in UI and UX designing. I have good ability in problem-solving and I am creative person. So, I can put my creativity in designing profession. I already worked to design some websites as a front-end developer during my studies in my college.
